JUNO: THE INTELLIGENT IOT PORTAL FOR YOUR DOOR SYSTEMS

Discover the **JUNO IoT Portal** – the smart solution for your door systems! The affordable IoT module and independent network technology give you easy access anytime, anywhere, without having to rely on local connections. **JUNO** offers predictive maintenance, reduces service costs and keeps your doors performing at their best. Thanks to the superlative network and data security provided by 3GP LTE technology, your systems have the very best protection against unauthorised access and attacks on network infrastructure. Benefit from the retrofit option for all door types and long-term maintenance planning for regular doors and fire extinguishers. **JUNO** – efficient, secure and universally available!

## **Smart Control Duo:** Our IoT control systems for fire protection and industry

Experience our Smart Control Duo: The JBS 601/701 door control system offers maximum security and reliability when it comes to fire protection, while the JTS Connect+ door control system impresses in the industrial sector with innovative networking and efficiency. Both systems seamlessly integrate state-of-the-art technology to offer you maximum control and monitoring. Count on our expertise to make your door systems fit for the future – secure, efficient and always networked!

Quick guide:
The Internet of Things (IoT)

The Internet of Things (IoT) connects devices to the internet so that they can collect and exchange data.
This makes it possible to automate and improve processes in areas such as industry, health and smart homes by using real time information to make them more efficient.

Our inexpensive IoT Portal is available anywhere and offers you the flexibility and security you need.

Benefits at a glance

✓ **Easy access:**
Access your doors anytime, anywhere.

✓ **Extra physical services:**
Benefit from enhanced service offerings.

✓ **Maintaining performance characteristics:**
Our technology guarantees optimum functioning of your doors.

✓ **Predictive maintenance:**
Reduce downtime with intelligent maintenance planning.

✓ **Lower service costs:**
Save money with efficient maintenance strategies.

✓ **Long-term planning for other building products:**
Integrate regular doors, fire extinguishers and more going forward.

✓ **Retrofit option:**
Our module is suitable for all door types.

✓ **Maximum network and data security:**
We ensure maximum security with 3GP LTE technology.
